

Linköpings kommun

Education Department
Child Care Group

It has been a while since we received an income statement from your household

Parents of children registered in municipal childcare who have a combined income of less than SEK 46,080 per month must declare their current **monthly income** once per year. This must also occur when there are changes to the household's combined gross income. Remember that household income can also be affected by changes to family relationships, parental leave, unemployment or sickness leave.

Declarations and changes of income can be made on the Linköping Municipality website using the same login procedures as those used for other childcare matters via <http://www.linkoping.se/barnomsorgpawebben>.

We need your current income statement as soon as possible. The letter you have received indicates the applicable dates.

Please note: Report only your current income. We are not interested in past income. These will be verified later through income verification.

You can read "Guidelines – Queue system – Fees" in its entirety on our website for more information regarding the calculation of income and income declaration. It states:

A guardian who does not declare current income information for the household once per year (every 12th month) or upon written request, may be placed in the highest fee category.

If you do not report your income by the date indicated in the letter, you will subsequently receive an invoice with the highest childcare rate.

The letter you have received contains a phone number that you can call if you have questions.

Sincerely,

The Children and Youth Committee
